**PRESS RELEASE**

## STEELLINER® rollers for power harrows

KUHN has added the STEELLINER® model to its range of rollers for power harrows. This roller completes the range of rollers designed for COMBILINER® combination seed drills.

Like the PACKLINER®, this roller is intended mainly for use with seed drills integrated on power harrows with a working width of 3.00 m to 4.00 m.

Its large diameter tube provides excellent weight-bearing capacity for built-in seed drills working equally well in light soil or heavy soil.

This roller is particularly useful in hard ground, to complete the rotor action in crushing large residual clumps.

Opening the furrow with metal ring gear and preferential tamping along the seed line facilitates seeding under difficult conditions and helps achieve uniform germination.

<b>SPECIFICATIONS</b>				
Width (m)	3	3	3,50	4
For rigid harrow	HRB 102/103 HR 103/104 and 1003/1004	HR 103/104 and 1003/1004		
Total diameter (mm)	496	550		
Tube diameter (mm)	406	460		
Tube thickness (mm)	6.3	5,6		
Scraper plates	Carbide coated as standard			
Seed spacing (cm)	12.5	12.5 - 15	14.3	12.5 – 14.3
Compatible with the INTEGRA seed drill	•	•	-	•
Compatible with EC/LC seed drills	•	•	•	•
Compatible with the NC seed drill	-	•	-	•
